Press Release

The TI-Expo + Conference provides the industry with solutions for CO₂ reduction

This new industry event TI-Expo + Conference will provide specialist information and practical knowledge on all aspects of technical insulation on 9 and 10 March 2022 at Messe Essen, thus serving as a key to CO₂ reduction for the industry. In this way, the TI-Expo + Conference is laying vital foundations for energy efficiency and the achievement of climate targets. The new organisers have already been able to determine the first key themes, programmes and partners.

Essen – Climate agreements, the European Green Deal and new ISO standards are forcing industry to act. Technical insulation makes a major contribution to climate neutrality and noise reduction. Due to quick implementations, short payback periods and effective cost reduction, technical insulation is easy to apply in many areas. The TI-Expo + Conference focuses on the possibilities and areas of application of technical insulation and is thus the new meeting place for the heat, cold, sound insulation and fire protection industry. Trade fair and conference will celebrate premiere on 9 and 10 March 2022 at Messe Essen and will be organised by the private trade fair organiser AFAG Messen und Ausstellungen in partnership with Rudolf Müller Mediengruppe, publisher of the trade magazine TI Technische Isolierung.

TI-Expo – The industry of heat, cold, acoustic and fire insulation meets in Essen

TI-Expo offers practical solutions for process chemicals and plants, refineries and tanks as well as air conditioning, refrigeration and building services. These solutions will help to achieve the corporate goals of energy efficiency, CO₂ reduction, sustainability and cost

savings. Technical building services planners, plant constructors and operators, architects & technical specifiers, energy officers & managers as well as contacts from industry associations and politics are among the main visitor groups at the TI-Expo + Conference.

Strong partners for this new industry meeting place

TI-Expo + Conference 2022 will take place under the patronage of the Hauptverband der Deutschen Bauindustrie (HDB), the Zentralverband des Deutschen Baugewerbes (ZDB), the European Federation of Associations of Insulation Contractors (FESI) and the European Industrial Insulation Foundation (EiiF). Other partners are the Bavarian Centre for Applied Energy Research e.V. (ZAE Bayern) and the Gesamtverband Schadstoffsanierung (GVSS).

Numerous well-known companies from all sectors of the industry will present themselves and their solutions at the TI-Expo in Essen: Saint-Gobain ISOVER or L'Isolante K-Flex from the manufacturer segment, industrial service providers such as the G+H Group, machine manufacturers such as MABI AG or Tacke+Lindemann from the specialist wholesale sector for commercial construction and technical insulation. The fair is also flying the flag internationally, with companies from Austria, Italy, the Netherlands, Poland and Switzerland among others taking part.

At the free TI-Expo trade fair forum, presented by the G+H Group, the programme will include keynote speeches from research and practice. The focus will be on best practice examples, products and solutions. The special "Innovation & Experience" area is the fair meeting point and invites personal interaction. Institutions and associations will present current projects as well as results and research work, while innovations, processes and exhibits will be presented in live demonstrations. On 9 March, the first day of the fair will be rounded off with a joint evening event.

TI-Conference – Practical lecture programme

Parallel to the Expo, this two-day conference will offer a comprehensive and practical lecture programme on the insulation of technical installations in industry and building services (TGA). Leading experts will speak on topics from the fields of energy efficiency and sustainability, standards and guidelines, digitalisation, research and development as well as maintenance and services. The TI Conference is thus aimed at building services planners and architects, plant operators (plant managers, energy

auditors, etc.), executives from contractors/processors, executives from product manufacturers and other interested parties. Recognition by various chambers has been applied for.

TI-Expo + Conference 2022 in Essen

The TI-Expo + Conference 2022 will be held parallel to the “SHK – the trade fair for sanitary, heating, air conditioning and digital building management” at Messe Essen. Visitors to SHK-Essen will have free admission to the Expo. It is recommended to make a hotel reservation in good time. The short distances in the Ruhr area offer numerous options in this regard.
